Summary

Software Engineer at SAP Labs with 3+ years of experience building scalable distributed systems and enterprise cloud platforms serving 2000+ global customers. Experienced in Java, microservices, and event-driven architectures, with hands-on work in Kafka-based systems and production-grade backend services. Additionally, built LLM-powered automation and multi-agent systems to enhance developer productivity and workflows.

Technical Skills

AI / GenAI: Generative AI, LangChain, LangGraph, Hugging Face, LLM Orchestration, Multi-Agent Systems, MCP Server Dev, RAG Pipelines, A2A Protocol, Prompt Engineering

Languages & Frameworks: TypeScript, JavaScript, Java, Python, SQL, C/C++, Node.js, Spring Boot, CAP, Kafka, UI5, Fiori Elements.

Cloud, Tools & Testing: Cloud Foundry, Distributed Systems, CI/CD, Agile/Scrum, REST APIs, SonarQube, SQLite, JUnit 5, Unit & API Testing

Work Experience

Associate Application Engineer | SAP Labs India

08/2022- Present

- Contributing to SAP Ariba Next-Gen Procurement platform serving 2000+ enterprise customers worldwide.
- Built MCP-powered multi-agent pipeline converting UI mockups to Fiori code; 92% accuracy, 95% dev time reduction (4 hrs → 10 min); piloting across 3 teams.
- Owned Auto-Receiving feature end-to-end using Java, Spring Boot, SAP CAP; implemented rule engines for commodity code and part number matching, reducing manual intervention by 70%.
- Led Split Accounting module across requisition and ordering; built real-time split calculations, ISO currency enrichment; reduced errors by 60%.
- Designed Segmented Search for Product Catalog enabling multi-shop results with dynamic filtering across 100+ supplier stores.
- Led receiving module development (21% contribution); delivered 125+ PRs across 3 microservices, with 98% merge success rate; exceeded delivery KPIs.
- Built Kafka event-driven features processing 10K+ events/day, enabling real-time procurement workflows and system scalability.
- Resolved 30 critical defects in Q1 release within sprint KPIs, achieving 100% demo success rate for key enterprise customers and securing stakeholder approval for production rollout.
- Built receiving-ui & admin modules from scratch; owned repo creation and LLM-assisted feature porting, accelerating development cycle by 40%.

Projects

- Fiori Page Generator [\[GitHub\]](#) - Multi-Agent AI Pipeline: Built a 7-agent AI pipeline using MCP protocol to convert UI mockups into production Fiori code - 92%+ code accuracy, 95% time reduction, piloting across 3 SAP teams.
- User Behavior Analytics Platform [\[GitHub\]](#) : Built ML dashboard with python, K-Means segmentation and Decision Tree churn prediction — 82% prediction accuracy; generates INVEST/KILL/FIX product recommendations.
- AI Content Summarizer Agent [\[GitHub\]](#) : Built LangGraph agent with A2A protocol supporting 6 content types (videos, PDFs, web pages) and multiple LLM providers (Groq, Claude, OpenAI) with configurable outputs.
- IoT Hazardous Gas Monitoring System [\[GitHub\]](#): Built NodeMCU-based sensor system detecting LPG, propane, and methane with real-time mobile alerts via Blynk within seconds of gas detection.

Publications

Unveiling User Behavior in Enterprise Applications

SAP TechNxt 2024 | Under Review: Solovyov Studies ISPU (UGC-CARE Journal)

Analytics framework (EDA, k-NN, Decision Trees) on 100K+ user records - predicts feature adoption & churn; addresses 70% feature underutilization in enterprise software.

Education

M.Tech in Software Engineering | BITS Pilani

2022 - 2024

B.Tech in Information Technology | LNCT, Bhopal

2018 - 2022

Certifications

GenAI with LangChain & Hugging Face - 2024 | Product Analytics (Pendo) - 2023 | JavaScript (NamasteDev) - 2023 | IoT (Tacthub) - 2022

Leadership and Volunteering

- Core Team Member, SAP Startup Studio - Supported early-stage startup initiatives within the SAP ecosystem.
- Corporate Social Responsibility (CSR) - Cleanliness drives, audiobook recording for the visually impaired, painting government schools.
- Innvent for Customers - Represented SAP in customer innovation events.
